Nationwide ... ECMC Services, Inc. has been awarded a nation-wide contract for environmental plan services for BBA Shared Services, Inc. (BBASSI). The contract covers all updates, revisions and new plan creation for Spill Prevention Control and Countermeasures Plans (SPCC), Facility Response Plans (FRP) and Storm Water Pollution Prevention Plans (SWPPP). BBASSI is the parent company for Signature Flight Support (SFS) and Aircraft Service International Group (ASIG). The contract covers over 100 bases.

In preparing the plans, ECMC Services, Inc. must evaluate whether or not the base is compliant with federal and state environmental regulations and spill response and reporting requirements. Environmental compliance is a key component to effective facility management. Company President Frank Prieto stated "Designing proper engineering controls into a project can prevent most spill scenarios from ever happening. Good engineering design up front assures that the facility is in compliance with all required environmental regulations."

ECMC Services, Inc. is an engineering firm specializing in all aspects of the planning, design and construction of fuel systems for both the commercial and military markets. The firm is also a licensed contractor and often performs as the lead firm in a design/build or CM-at-Risk project.
